Classroom Crafting with Carol  
Celebrations and Gifts

Here's an easy to make and useful Father's Day gift! Dad can use the *My Dad Rocks* gift to store coins, office or workshop supplies.

## Materials:

- My Dad Rocks Label Template
- Father's Day Gift Certificates
- Two Rocks (big and small)
- Paint (blue or green)
- Paint Brushes
- Glass Jar with Lid
- Tape
- Markers
- Wiggly Eyes (8)
- Elmer's Glue
- Glue Gun (adult only)

## Instructions:

### Teacher

1. In your classroom newsletter ask for each child to bring in a glass jar with a twist on lid. If you don't feel comfortable with using glass, you could ask for plastic containers (sour cream, butter or large yogurt).
2. Go for a walk around the school and let the students find two rocks. One will be the daddy rock and the smaller one will be the child rock. (Rocks need to be small enough to fit on the top of the lid.)
3. Use the glue to glue two rocks onto each lid. Let the glue cool off and dry. (adult only)

### Students

1. Use Elmer's glue to glue the wiggly eyes onto the rocks.
2. Paint the lid and let it dry.
3. Use the blue paint and your thumb print (to make a large rock) and a finger (to make a small rock) on the *My Dad Rocks* label.
4. Glue wiggly eyes on the thumb and finger prints. Let it dry.
5. Color, cut out and glue the guitars onto the rocks and the fingerprints on the *My Dad Rocks* label.
6. Glue the label onto the glass jar.
7. Fill the jar with Father's Day Gift Certificates and/or other things your dad will like.
